Visakhapatnam 10. West Godavari
		<i>NB: In addition, some selected districts from Odisha and Uttarakhand , and NCR of Delhi would also be covered under the project for taking up some pilots.</i>		

N - New, bifurcated from existing districts; * Revised after bi-furcation of the State in 2014

¹ Most of these districts (146) have been selected through ranking of 548 districts for which nutritional status information was available from the second round of District Level Household Survey (DLHS-2: 2002-04), using a composite index comprising two parameters, viz. (i) proportion of children below six years who are underweight (weight-for-age, <-2SD), and (ii) anaemia level among pregnant women of age 15-44 years. (Ref. *Mapping of High Burden Districts – A study undertaken by the World Bank in 2007 through a Research Agency to identify high burden districts for intensive support under the project. The ranking of districts was based on the number of districts (548) for which relevant data was available from DLHS-2.*)
